Centurion Technologies

Centurion Technologies pioneered what is called "reboot and restore" technology. A short description of the features and benefits of the program is listed below. For a more detailed description please see the Centurion website. www.centuriontech.com

We Protect Your Image!

CenturionGuard® is designed with a unique patented technology that has withstood the test of time in school and university classrooms and labs located throughout the world. CenturionGuard® uses a lock and key to enable and disable security protection.

Users can manipulate the desktop, install software, change settings, and download potentially harmful files from the Internet! No worries, a simple reboot of the computer restores it back to your defined configuration without the risk of probable harm from the user's session. CenturionGuard® simply wipes the session changes free leaving the computer like new.

Additionally, CenturionGuard® protects the computer from viruses during the time when a virus is written and released but before it has been discovered and remedied. When CenturionGuard® disposes of the changes made to the computer, potentially harmful files such as worms, trojans, viruses and spyware are wiped free from the machine never obtaining the chance to infect or attach to the hard drive.

Benefits:

- Reduces computer maintenance by up to 90%
- Eliminates re-imaging
- Ensures consistent configurations
- Improves the classroom technology experience
- Provides unrestricted access
- Can operate in stealth mode
- Patented hard-drive security has never been compromised
- Enhancement to virus protection
- Enhances computer performance by eliminating the need for most routine hard drive maintenance
- Superior product design allows user full access to computer without time-consuming management restrictions
- Reduces Total Cost of Ownership of institution assets by minimizing hard drive maintenance, administration time, and troubleshooting

Up and Running with Just One Reboot

- No matter how hard technology professionals try to simplify and secure computing environments, they still have to deal with the dangers of our connected world on a daily basis. While it's great that computer users have instant access to almost everything they could possibly want, it's also a scary world out there for the unprotected. Inexperienced users delete the OS from their hard drive, new viruses pop up every day, and malicious hackers try to steal personal information by attaching spyware to everything.

- With Centurion Technologies products enabled on all client machines, you and your organization can rest assured that you're protected. No other product on the market can ensure uptime and simultaneously reduce the number of

maintenance problems many IT staff deal with every day. All unwanted changes to a PC or Mac -- whether user error, malicious intent, or a unexpected virus – are wiped clean and computers are returned to previous state with just one reboot.

CompuGuard CornerStone

Takes the worry out of consistency and security issues

Reboot. Restore. Rejoice! It's that simple.

How would 100% uptime improve your productivity? You can experience industry leading Instant Restore™ hard-drive protection, enable users to save files, and provide system administrator controls for maximum efficiency of your computer environment with CompuGuard CornerStone™. The benefits to you include:

- Eliminate maintenance and security issues.
- Dramatically reduce computer maintenance time.
- Provide unrestricted access to a user.

Designed based upon a unique patented technology that has protected libraries, universities and school labs throughout the world, Centurion's hard drive and configuration protection software solution uses Instant Restore technology to ensure a higher level of security and stability on multi-platforms. Users can manipulate the desktop, install software, change settings, and download potentially harmful files from the Internet! A simple reboot of the computer restores it back to the administrator's pre-defined pristine configuration. CornerStone simply wipes the session changes free… leaving the computer like new.

But you want to save some files? Persistent Storage enables you to permanently save documents, emails or other information if desired. Upon reboot, changes saved to Persistent Storage remain constant and unchanged.

CompuGuard CornerStone key features include:

- **Partition Based Protection** - enable or disable Instant Restore protection on a per partition basis… any changes made to a system while protection is enabled are removed upon reboot.
- **Persistent Storage** - create an additional drive to be used for persistent storage of data while protection is enabled on other drives.
- **USB Blocking** - block portable data storage devices from connecting to the machine such as USB drives, cameras, data sticks, etc.
- **Remote Management** - remotely manage the hard drive protection software by using the CompuGuard Control Center (CCC)™.
- **Remote Execute** - Ability to execute and/or 'push' executables or batch via our CCC - no third party tool needed. Highlight clients and choose what to execute via Remote Execute's Browser.
- **Oops!** - set and change current protection status without rebooting. Start computing in unprotected

mode when you wanted to be protected? Just click the Oops! button and you are now magically protected without having to reboot your computer.

- **Disabling of Keyboard and Mouse** (via the Control Center) - Disable keyboard and mouse as needed for maintenance, improper public use, etc.
- **Multiple Password Feature** - Up to three passwords on client - Admin password for ultimate control + 2 additional passwords to be used as needed.
- **Automatic Updates** - configure CornerStone to check for updates from the web or the CompuGuard Control Center (CCC)™.
- **Stealth Mode** - run visibly or hidden while protection is enabled.
- **Unattended Installation** - automate the installation process.

This product retails for $69.95 per computer or $19.95 educational price. **Through a special price negotiated by the NADOE, the price for all Adventist institutions is $5.00 per computer**. This price includes the first year support and maintenance; additional years are only 20% of your total bill. Also included in this price are the centralized support module and the loading module that allows you to load any software on all network machines at one time from the server. This is an international contract and includes higher education, hospitals, and all official Adventist institutions. Highly recommended for all school computers by NAD Technology and Distance Education Committee
